   News, Entertainment, Learning, Email, Work, Communication

Test Facilitator's Script:

Welcome and Purpose

Thank you for agreeing to participate in this test based on a web/project named AnimeWatch. Today we are asking you to serve as a participant to help evaluate this specific web product and to complete a set of scenarios. These scenarios or rather tasks will require the individuals to navigate to certain pages and test certain features on said pages/ Our goal is to see how easy or difficult you find the Anime Watch web/ product to use when utilizing said pages. We will record your reactions and opinions; so, we may ask you to clarify statements that you make from time to time.

Test Facilitator's Role

I'm here today to record your reactions and comments of the web/product named AnimeWatch you'll test today. During this session I will not be able to offer any suggestions or hints. There may be times, however, when I'll ask you to explain why you said or did something.

Test Participant's Role

I will ask you the individual to complete a set of 3 tasks, to learn if it works well for the individual. We ask that you "think out loud" as you work through these tasks. Tell us everything you are thinking as you attempt to determine how to complete each step. You also will be asked a series of questions about your experience at the end of this session.

Things to Keep in Mind

Here are some things that you should know about your participation:

- This is not a test of you; you're testing the AnimeWatch web/product. So don't worry about making mistakes.
- There is no right or wrong answer. We really just want to know if we designed the product well for you.
- If you ever feel that you are lost or cannot complete a scenario with the information that you have been given, please let me know. I'll ask you what you might do in a real-world setting and then move you on to the next task.
- We will be taking notes during this session for further study if needed. Your name will not be associated or reported with data or findings from this evaluation. Please fill out the consent form.
- Finally, as you use the web/product, please do so as you would at home or your office.
- Do you have any questions before we begin?

Opening Script:

Hi my name is Bryan or Lisa (Depends on Individual whose with participants), and thank you for participating in the usability test for the AnimeWatch Product. It is important to note that this is a usability test which will consist of the participants will be given certain tasks to do when interacting with said project. These tasks will require the participants to test out certain pages and the features that are located on the page.

First, I would like to inform you that we are testing the website/product titled 'AnimeWatch', not the participants. Also, the individual, if at whatever point does not want to continue the test, they have the option to stop the test at any time they wish.

Please feel free to talk about your thought process as you perform the tasks. Don't worry about errors or how long it takes. We are not testing you; we're testing our interface.

If you have difficulties, that means there's a problem with our interface, and that's what we're looking for. We cannot help you during the tasks, so if you get stuck, just try to play around with the available buttons. We can answer any of your questions after the tasks are completed. Now here are the tasks that the individuals need to perform.

First Task: Requires the participant to navigate to the Anime Ranking page and test out the Ranking Type which contains multiple selections to choose from. The individuals will test out certain selections of their choosing.

Second Task: Would require participants to navigate into the Anime Conventions page and utilize the features located on said page. Individuals will be tasked with interacting with said map and other features that are located in said page.

Third Task: Participants will navigate into the Anime Facts page and test out the page. This will be done by an individual inserting an Anime name which should proceed to allow the user to view a variety of results.

AnimeWatch Usability Testing

Date(s):
[12/1/2022-12/3/2022]

Location:
[Online via Zoom]

Usability.gov
Your guide for developing usable and useful Web sites

Testing the functionality of the product/site titled 'AnimeWatch'
[12/1/20022]
[Online Via Zoom]
Web Site: [https://bryanb546-pythonstreamlib-project-app-7efhvq.streamlit.app/]

Notetaker: Bryan Bravo, Lisa Shrestha
Date:12/1/2022
Location: Online

Purpose:
The purpose of this test is to learn how well a representative in this case a participant is able to utilize the website/product. Participants may encounter issues on using the website/project in which feedback may be required to further improve future iterations of said product.

Introductory Questions & Tasks

- Have you heard of [AnimeWatch]? ____Yes _____No (Selected)
  If so, tell me what you know about the site and what are your honest impressions of the site upon visiting?
  - **Yes, It's a site to find out anime convention near by. My impression was it's little less colorful.**

- Bring the test participant to [site]. **Ask:** "Just from looking at this site, what kinds of information do you think you could get from this site? Please be specific."
  - **Information about Anime related stuff.**

- Who do you think this site is designed for? Why? *(Probe: public, health professionals, etc.)*
  - ***Public***

- In your opinion should more features be added if so which features does the participant believe should be present on the site?
  - **Yes, Participate believed that video player feature should be added.**

Your guide for developing usable and useful Web sites

Scenarios
[Three are presented here; you may wish to add other scenarios.]

Scenario 1 – Participants will navigate to the Anime Ranking page and test certain selections.
Using **[https://bryanb546-pythonstreamlib-project-app-7efhvq.streamlit.app/]**

Task(s)	Success (Circle 1)	Notes/Observations
Navigate to Anime Ranking page and try different selections on said page.	☺ 0 ☹ 1 ☹ 2 💣 3 ☺ 0 = User completed task with zero difficulty. (Zero Frustration) ☹ 1 = User completed task with only minor problem(s). (Little Frustration) ☹ 2 = User completed task, but it required more effort/time/dead-ends than the user expected. (Medium Frustration) 💣 3 = User did not complete task. (High Frustration)	(Note why was the user successful or not successful, e.g., wrong pathways, confusing page layout, navigation issues, terminology) **User was successful because of easy drop down menu on the right** If user does not follow the known path, what did s/he click on? **Site was pretty straight forward user always click on drop down** User's Verbal comments: **Fun site, I like it, It's pretty nice** **Any suggestions for making this (task) easier?** N/A

Usability.gov
Your guide for developing usable and useful Web sites

Scenario 2 – Participants utilize Anime Convention page and use features
Using **[https://bryanb546-pythonstreamlib-project-app-7efhvq.streamlit.app/]**

Task(s)	Success (Circle 1)	Notes/Observations
Navigate to the Anime Convention page and interact with the map located on the page	 ☺ 0 = User completed task with zero difficulty. (Zero Frustration) 😐 1 = User completed task with only minor problem(s). (Little Frustration) ☹ 2 = User completed task, but it required more effort/time/dead-ends than the user expected. (Medium Frustration) 💣 3 = User did not complete task. (High Frustration)	(Note why was the user successful or not successful, e.g., wrong pathways, confusing page layout, navigation issues, terminology) **User was successful because of easy navigation** If user does not follow the known path, what did s/he click on? **Site was pretty straight forward user always click on drop down** User's Verbal comments: **Fun site, I like it, It's pretty nice** **Any suggestions for making this (task) easier?** N/A

Usability.gov
Your guide for developing usable and useful Web sites

Scenario 3 – Participants will utilize the Anime Facts page and use features on said page.

	A	B	C
1	**Task(s)**	**Success (Circle 1)**	**Notes/Observations**
2	Navigate to the Anime Facts page and interact with the map located on the page	 ☺ 0 = User completed task with zero difficulty. (Zero Frustration) 😐 1 = User completed task with only minor problem(s). (Little Frustration) ☹ 2 = User completed task, but it required more effort/time/dead-ends than the user expected. (Medium Frustration) 💣 3 = User did not complete task. (High Frustration)	(Note why was the user successful or not successful, e.g., wrong pathways, confusing page layout, navigation issues, terminology) **User was successful in navigating the page but encountered a minor graphical issue in which the Ikuzo button was not properly configured in which the text came out vertical instead of horizontal but regardless of text orientation the button worked.** If user does not follow the known path, what did s/he click on? **Site was pretty straight forward user always click on drop down** User's Verbal comments: **Fun site, I like it, It's pretty nice** **Any suggestions for making this (task) easier?** N/A

Exit Questionnaire:

Participant 1:

Please Let Us Know What You Think...

(Please note, any information you provide is for internal use only.)
You may wish to customize this section for general questions about your site

AnimeWatch **web site/product Feedback**

1. What is your overall impression to AnimeWatch
   Simple, but it accomplishes the job.

2. What features of the AnimeWatch web site/product were vague or confusing to you, if any?
   Getting around was a bit confusing at first, as simple as the website is, the content different sections need to be more available to the user.

3. What is your impression about navigating the site/product? Does it seem easy or difficult? What makes it that way?
   Difficult until you figure out where to go, then it is simple to get around.

4. What else should be included on the AnimeWatch web site/in the product?
   Maybe links to streaming services that are currently running the anime or where available.

5. What did you like best about the site/product?
   The no frills quick search feature

6. What did you like the least?
   the layout of the site

7. Do you think some people would have problems using the AnimeWatch web site/product? What kinds of people? What kinds of problems?
   I think there's a learning curve on getting around the site, once you know where to go then it's much easier.

8. Do you feel this site is current? Why?
   Yes, it has all the info for current and older anime content.

9. If you were to describe this site to a colleague in a sentence or two, what would you say?
   Simple to use anime tracker

10. Would you like to make any other comments about the AnimeWatch site/product?
    Error in the Statistics section, put a work in progress image or something similar.

Other Possible Exit Questions/User Impressions

- What is your impression of the search capability?
  Very quick and accurate
- If you were the website developer, what would be the first thing you would do to improve the website?
  Layout, images, and ad revenue.
- Is there anything that you feel is missing on this site? *(Probe: content or site features/functions)*
  Streaming info, also anime ranking only shows a poster, no info.
- Do you have any other final comments or questions?
  The website needs work but it's core component works very well.

Participant 2:

Please Let Us Know What You Think...

(Please note, any information you provide is for internal use only.)
You may wish to customize this section for general questions about your site

AnimeWatch **web site/product Feedback**

1. What is your overall impression to AnimeWatch
   It was very simple

2. What features of the AnimeWatch web site/product were vague or confusing to you, if any?
   I don't watch anime, so this probably isn't for me, I didn't know where to go at first to find the anime.

3. What is your impression about navigating the site/product? Does it seem easy or difficult? What makes it that way?
   It was easy to switch between pages using the menu.

4. What else should be included on the AnimeWatch web site/in the product?
   maybe some videos?

5. What did you like best about the site/product?
   the information displayed for anime, I was able to find sailor moon

6. What did you like the least?
   N/A

7. Do you think some people would have problems using the AnimeWatch web site/product? What kinds of people? What kinds of problems?
   No, I don't think so.

8. Do you feel this site is current? Why?
   It's very simple and minimalist.

9. If you were to describe this site to a colleague in a sentence or two, what would you say?
   The website is good for looking up anime

10. Would you like to make any other comments about the AnimeWatch site/product?
    N/A, I like the website, it has potential.

Other Possible Exit Questions/User Impressions

- What is your impression of the search capability?
  Very good, a lot of results.
- If you were the website developer, what would be the first thing you would do to improve the website?
  Add more flair, background images and videos.
- Is there anything that you feel is missing on this site? *(Probe: content or site features/functions)*
  No
- Do you have any other final comments or questions?
  Good job!

Participant 3:

Please Let Us Know What You Think…

(Please note, any information you provide is for internal use only.)
You may wish to customize this section for general questions about your site

AnimeWatch **web site/product Feedback**

1. What is your overall impression to AnimeWatch
   - It was very easy to use and I was impressed by the anime facts and anime ranking page as I am a huge enthusiastic of anime.

2. What features of the AnimeWatch web site/product were vague or confusing to you, if any?
   - **Little confused on why the survey feature was there**

3. What is your impression about navigating the site/product? Does it seem easy or difficult? What makes it that way?
   - Navigation to the site was pretty easy due to small drop down on the left hand side.

4. What else should be included on the AnimeWatch web site/in the product?
   - **Originally I thought the site was to watch anime. And so a video player showing the episode would have been nice**

5. What did you like best about the site/product?
   - **It was very simple to use**

6. What did you like the least?
   - **The website could have little more flasher and colorful.**

7. Do you think some people would have problems using the AnimeWatch web site/product? What kinds of people? What kinds of problems?
   - **Nothing comes to mind**

8. Do you feel this site is current? Why?
   - **I am not sure if I understand this correctly. But if it is asking if this site has a modern look then I agree.**

9. If you were to describe this site to a colleague in a sentence or two, what would you say?
   - An easy website to find out about type or popularity of anime, and anime conventions

10. Would you like to make any other comments about the AnimeWatch site/product?
    - **No**

Other Possible Exit Questions/User Impressions

- What is your impression of the search capability?

  - **I loved it. It was very intuitive and very easy to use**

- If you were the website developer, what would be the first thing you would do to improve the website?

  - **I would add a video player tab where you can watch the anime**

- Is there anything that you feel is missing on this site? *(Probe: content or site features/functions)*

  - ***The video player feature that I have mentioned earlier***

- Do you have any other final comments or questions?

  - **No**

Participant 4:

Please Let Us Know What You Think…

(Please note, any information you provide is for internal use only.)
You may wish to customize this section for general questions about your site

AnimeWatch **web site/product Feedback**

1. What is your overall impression to AnimeWatch

   Pretty good, could use some more work

2. What features of the AnimeWatch web site/product were vague or confusing to you, if any?
   Survey feature, Anime videos

3. What is your impression about navigating the site/product? Does it seem easy or difficult? What makes it that way? _
   Easy, the Left sidebar is helpful for navigation while rest of screen can be used for content. Left sidebar can have more content

4. What else should be included on the AnimeWatch web site/in the product?

   Options to comment on anime, rate them, maybe discussion forums,

5. What did you like best about the site/product?
   Ease of use

6. What did you like the least?
   Bland website design, not much content right now. Some colorful themes would be nice

7. Do you think some people would have problems using the AnimeWatch web site/product? What kinds of people? What kinds of problems?
   People having trouble reading small letters,
   People having trouble with reading less-contrasting content

8. Do you feel this site is current? Why?
   No, it does not have the look and feel to cater to its audience

9. If you were to describe this site to a colleague in a sentence or two, what would you say?
   A website to watch and find out about anime, and anime conventions

10. Would you like to make any other comments about the AnimeWatch site/product?
    Keep it up

Other Possible Exit Questions/User Impressions

- What is your impression of the search capability?

  It was nice

- If you were the website developer, what would be the first thing you would do to improve the website?

  Make it little colorful

- Is there anything that you feel is missing on this site? *(Probe: content or site features/functions)*

  No

- Do you have any other final comments or questions?

  No

Final Recommendation:

According to the interviewees it was overall an easy-to-use application. The user initially thought it was for anime so that could have been better clarified in the website. Apart from that the color/ design could be changed to further appeal to the interviewees. Also, the survey on the website seems pointless. When it came to using certain features or pages users seemed to enjoy using the anime facts and anime ranking features. In addition to that they are very intrigued with the map feature of anime conventions.

Analyzing all the opinions and comments that the participants said during the test. It can be shown that the individuals did indeed enjoy the website but when it came to using certain features certain bugs will appear on certain pages. This is evident by the Ikuzo button being displayed horizontally and issues in some of the pages almost seeming as if the page couldn't display certain features. Although the tasks required the user to visit pages in which they work it also proved that the site/product still needs further improvements and features that will entice further people and fix the issues that the participants experienced.
